ABSTRACT

This document is an attempt to bring together in one source a comprehensive statistical picture of public post-secondary two-year institutions in Iowa during the 1972-73 school year. Much of the data in this publication is presented in tables. Brief narratives and charts have also been included to assist in providing the reader with a more easily understood publication. There are 75 tables or figures presented in the document. (Author)

FOREWARD

DATA ON IOWA'S AREA SCHOOLS is an attempt to bring together in one source a comprehensive statistical picture of public post-secondary two-year institutions in Iowa during the 1972-73 school year.

This is the fifth effort to provide this data in a single source, and represents a more adequate effort than previous publications. We anticipate this publication will provide an important source of data for those interested in public post-secondary two-year institutions and will also serve as a permanent resource of information for future researchers interested in the development of Iowa's area schools.

Much of the data contained in this publication is presented in tables. Such a format is almost essential if the information is to be presented in an economical manner. However, in addition to the tables, brief narratives and charts have also been included to assist in providing the reader with a more easily understood publication.

Most of the data presented in this publication has been made available from records of the Area Schools Division. Inquiries concerning this data or additional information related to this data may be directed to the Area Schools Division of the Iowa State Department of Public Instruction.

ORGANIZATION

Iowa's area schools constitute a statewide system of public two-year post-secondary institutions. Each area school serves a multi-campus merged area which varies in size from approximately four to eleven counties. All area schools offer a comprehensive educational program available to all Iowans; there are no residence restrictions which would prohibit Iowans from attending any of the area schools.

All counties in the state are included in the fifteen merged areas. The last county to affiliate with the merged areas was Cherokee County which joined the statewide system of merged areas in the spring of 1971.

Area schools were first developed in 1966. An act permitting the organization of merged area schools was approved by the legislature in the previous year. This act permitted area schools to be organized as either area community colleges or area vocational schools. During the 1972-73 school year, eleven of the area schools operated as area community colleges and four as area vocational schools.

All area schools are operated by locally elected boards of directors. These boards vary in size from five to nine members. The chief administrator employed by the area school board of directors is identified as a superintendent.

Area schools may to some extent be considered the successor of the public junior colleges that previously operated in Iowa. The first of these Iowa public junior colleges, Mason City Junior College, was organized in 1918 as a division of the local secondary school district. Additional public junior colleges similarly organized were subsequently developed and a total of thirty-five different public junior colleges were organized prior to the development of area schools. A number of these public junior colleges discontinued operation--a few to reopen at a later date--until in 1965, the year prior to the development of area schools, there were sixteen public junior colleges operating in Iowa. With the development of the area schools, these public junior colleges gradually merged with area schools until only one public junior college remained operating during the 1969-70 school year. This public junior college, Emmetsburg Community College, merged with Iowa Lakes Community College at the beginning of the 1970-71 school year.

The state governing board responsible for area schools as well as the public elementary and secondary schools in Iowa is the State Board of Public Instruction. This board has the responsibility for providing leadership to area schools and supervising the regulation of these institutions. The State Board in conjunction with the State Board of Regents also has the responsibility for developing departmental rules for area schools. The State Board is advised on the operation of area schools by a nine member State Advisory Committee on Area Schools established by statute.

The fifteen area schools operate programs throughout the merged areas they serve. There are a total of twenty-six major campuses operated by area schools. In addition, there are numerous programs and courses operated on off-campus sites; frequently in conjunction with other agencies such as local public secondary school districts. The last major campus to be developed was the Dubuque Campus opened by Merged Area I during the 1971-72 school year. A unique new site to serve the inner city of Des Moines was opened in a rented facility by Merged Area XI at the beginning of the 1972-73 school year.

Nine of the area schools are multi-campus institutions that operate two or more major campuses. These institutions are considered a single institution for most purposes although the local operation of each institution may vary considerably. Fox example, some area schools provide for a high degree of local autonomy in the operation of individual campuses (particularly those area schools where campuses are located a considerable distance from each other) while other area schools operate with a more centralized administrative organization.

The chapter of the state statutes that includes the basic act authorizing the development of area schools is Chapter 280A, Code of Iowa. Chapter 286A, Code of Iowa, is the chapter that provides the procedure for payment of state general aid to area schools.

Area schools are approved through a procedure that involves comprehensive self-studies prepared by each institution and followed by an evaluation team visit by a team composed of representatives of the State Board of Public Instruction and the State Board of Regents. Approval recommendations for area schools are developed as a result of these visitations and in the years between the evaluation team visits all area schools are visited annually by representatives of the State Department of Public Instruction. During the 1972-73 school year, all area schools were visited by annual visitors representing the State Board of Public Instruction. All of the area schools visited during the 1972-73 school year were recommended for a continuation of their approval status.

The approval status of area schools and the North Central Association of Colleges and Secondary Schools (NCA) status of those schools that had some affiliation with this association during the 1972-73 school year are indicated below:

MERGED AREA	APPROVAL STATUS	DATE FOR REVISIT BY EVALUATION TEAM	NCA ACCREDITATION STATUS[1]

EDUCATIONAL PROGRAMS

Iowa's area schools offer a wide variety of full-time and part-time educational programs. Educational opportunities are offered to a broad spectrum of Iowans within the respective merged areas in keeping with the mandate of the statutes authorizing the development of area schools.

Programs offered in area schools may be divided into four broad catagories: adult education; college parallel education; career education; and specialized education programs for disadvantaged, handicapped, and other citizens with special needs.

Adult education divisions offer part-time programs for adult Iowans that include these major programs:

Adult Basic Education - Education for adults that is equivalent to an eighth grade education.

High School Completion - Education that includes adult high school courses and preparation for the high school equivalency examination for adults who have not completed a high school education.

Continuing and General Education - Education that includes a variety of experiences for adults of a pre-occupational, special purpose, avocational or recreational nature.

Career Education - Education that includes part-time supplementary programs for employed adults to upgrade occupational skills and short term preparatory programs of less than one term in length to prepare students for immediate employment.

Adult College Parallel - College parallel courses for part-time students usually offered in the evening or as extension courses away from major campuses.

Career education divisions offer specialized full-time occupational training for preparation for employment in approximately ninety different careers. These programs vary in length from a term of twelve weeks to two years (preparatory career education programs of less than twelve weeks in length are frequently offered in adult education divisions). Many of these career education programs include opportunities for cooperative paid work experience in the occupations for which training is offered.

College parallel divisions offer full-time programs of courses equivalent to the first two years of a baccalaureate degree program. These programs are intended either for transfer to four-year institutions or in some cases as programs that in themselves provide preparation for employment in a number of careers such as accounting, community services associate, law enforcement, library services, secretarial science and teacher assistant.

Specialized programs are offered in accord with needs within local areas. These programs include orientation centers for disadvantaged and handicapped, sheltered workshops, occupational training for inmates of correctional institutions, related instruction for workers employed in apprenticeship programs, occupational education for students who are also enrolled in local high schools, programs to train instructors to teach in adult basic education programs, part-time literacy preparation programs for migratory workers, occupational training for disadvantaged minority groups, in-plant occupational training for employed workers, community service programs, programs to prepare citizens for civil defense and other emergencies, programs in consumer homemaking for disadvantaged persons, and educational programs for persons convicted of driving while under the influence of alcohol. These programs are frequently offered through one of the three major educational divisions of the institutions but, in some cases, they are organized as specialized programs independent of these divisions.

CAREER EDUCATION PROGRAMS

The preparatory career education programs offered in area schools are identified below. These programs are organized sequences of courses that are offered for at least one quarter of twelve weeks or more for full-time programs and from four to twelve weeks for short-term[1] programs. In the case of multi-campus institutions, the location of each program is identified. In addition to these programs many institutions offer a number of part-time and other specialized programs that are far too numerous to attempt to identify separately.

PREPARATORY CAREER EDUCATION PROGRAMS
OFFERED DURING 1972-73 SCHOOL YEAR

Area I - Northeast Iowa Area Vocational-Technical School

Taxonomy Number	Name of Program	Location	Enr.[2]	Length of Program
01-01000000	Agricultural Production	Calmar	28	78 weeks
01-02000000	Agricultural Supplies and Services	Calmar	25	78 weeks
01-03010000	Agricultural Power and Machinery	Calmar	33	84 weeks

COLLEGE PARALLEL COURSES

Eleven of the area schools were organized as area community colleges during the 1972-73 school year and offered a college parallel program equivalent to the first two years of a baccalaureate degree program. The majority of college parallel courses offered in these institutions are organized as day-school courses within the college parallel divisions. The following information indicates the college parallel courses offered during the fiscal year 1973 in area community colleges. The majority of these courses are offered as credit courses that will generally transfer as credit to four-year institutions. In a few cases, courses are offered in college parallel divisions that are not intended for transfer purposes. These courses are identified with an "x" below the credit hour column. Some courses are offered in quarter terms and others in semester terms. Above each of the credit columns for each institution is either a "q", to indicate a quarter, or an "s", to indicate a semester term. A separate section includes those adult college parallel courses offered in adult education divisions.

The number of sections offered for each course during the fiscal year 1973 is identified behind the name of each individual course.

The majority of area community colleges offer within their college parallel divisions college parallel career-option programs. These programs, usually two year associate degree programs, offering students an opportunity to earn college credit while also preparing for immediate employment. Many of these programs are structured to provide an opportunity for a student to receive some work related experiences while they are enrolled in the program.

1 - Fall Term Enrollment
2 - Spring Term Enrollment

ADULT EDUCATION

The broad scope of adult education programming might best be illustrated by the following paradigm.

A. Adult College Parallel - evening - extension

B. Career Education - Supplementary Career Education and Programs in Preparatory Career Education

C. General Adult Education

  1. Adult Basic Education

  2. High School Completion

    a. Diploma

    b. Equivalency

  3. Continuing and General Adult

    a. Classes eligible for State General Aid

    b. Classes not-eligible for State General Aid (Avocational/Leisure Time)

The adult college parallel offerings are those courses which are offered usually during the evening or late afternoon and administered by the Adult Education Division. The enrollment is most typically divided among adults who are pursuing the course offerings with some type of academic degree in mind or for just personal fulfillment.

The second major classification of the adult education program is Supplementary Career Education. Supplementary Career Education is an educational offering designed to provide training for persons who have already entered the labor market and who need additional training to achieve stability or advancement in their current employment. While supplementary offerings tend to be comprised of short-term training periods, they also may be of longer duration.

For fiscal year 1973, employed adults seeking up-grading in their jobs attended 3,594 supplementary courses. Supplementary career courses were attended by 70,992 adults in the areas of Agriculture, Distribution, Health, Home Economics, Office, Technical, and Trade and Industry.

The following represent a cross section of the supplementary career courses offered in area schools:

- Auto Mechanics
- Banking Courses
- Blueprint Reading
- Boiler Maintenance
- Bookkeeping
- Care of Patient with Stroke
- Chartered Life Underwriters
- Construction Safety and Health
- Consumer Electronics
- Coronary Care
- Custodial Maintenance
- Emergency Medical Technician
- Fire Service Training
- Industrial Controls
- Industrial Safety--Key Man Program
- In-Service Government Program for Governmental Employees
- Introduction to Computer Concepts
- Management by Objectives
- Office Machines
- Supervisory Practices

The General Adult Education section of this three pronged program can also be sub-divided into three classifications, Adult Basic Education, High School Completion and Continuing and General Adult. The Adult Basic Education Program centers its emphasis on up-grading essential literacy skills. Although literacy or basic education for adults is one of the oldest components of the adult education movement in the United States, it has received relatively little attention until the present. Attention to this problem has recently become a major thrust of the adult education field with both State and National emphasis being placed on its importance. The 61st General Assembly of the State of Iowa, realizing the importance of programming in this area, enacted in 1965 legislation which would lend assistance to the merged area schools and adult education. The Economic Opportunity Act of 1964 (Public Law 88-452) prompted immediate attempts to raise the educational level of adults who had completed less than eight years of school.

> "The term 'Adult Basic Education' means education for adults whose inability to speak, read, or write the English language constitutes a substantial impairment of their ability to get or retain employment commensurate with their real ability, which is designed to help eliminate such inability and raise the level of education of such individuals with a view to making them less likely to become dependent on others, to improving their ability to benefit from occupational training and otherwise increasing their opportunities for more productive and profitable employment, and to make them better able to meet their adult responsibilities."[1]

Underlying basic education is the assumption that only the literate adult can participate fully in present day American life. Literacy implies the

---

1-Federal Register, Vol. 32, No. 77-Friday, April 21, 1967. Subpart A-Definitions-Paragraph 166.1, Subsection c.

ability to deal successfully with a variety of situations such as completing applications (i.e. insurance, loans, driver's licenses, employment), defining geographical directions, being able to differentiate between an editorial and a news article, appropriately responding to a child's school performance or just coping with day to day life skills and/or making up a budget, adjusting recipes, etc.

A recent survey of functional reading ability among adults in the United States yielded the revealing data that 4% of the United States population 16 years of age and older (approximately 4,649,000 adults) suffer from serious reading deficiencies. According to the U. S. Census of 1970 there are 116,801 adults 25 years or older in Iowa who have not completed an eighth grade education.

The program was continued and expanded with the passage of the Adult Education Act of 1966 (Public Law 89-750). Auxillary to the Adult Basic Education course work is the High School Completion program. High School Completion can be broken down into the equivalency and diploma programs. The emphasis of these two programs is placed on securing a high school education. The High School Equivalency program prepares the adult to take the General Educational Development test which is produced by the American Council on Education. The High School Diploma program allows the student an opportunity to pursue a diploma outside of traditional scheduling administered through the local secondary school. The United States Census of 1970 has estimated that there are approximately 600,000 adults 25 years or older in Iowa who have not completed high school.

Also associated under the general adult education framework are the continuing and general adult courses which can be divided on the basis of state funded eligibility. The continuing adult educational courses are those that provide the student with an up-grading of technical skills not necessarily associated with one's livelihood. The general adult education courses not eligible for state aid are related to avocational or leisure time activities. These activities are directed at providing a community service to the constituents of the state wide system of merged area schools.

The courses below represent a cross section of the continuing and general adult education courses offered in area schools:

Continuing and General Adult
(Eligible for State General Aid)

Adult Driver Education
Budgeting
Conversational German
Defensive Driving
Drug Abuse for Parents
Family Finances
First Aid for the Housewife
Help Your Child Learn to Read
Personal Income Taxes
Single Parent Seminar
Wills, Estates, and Trusts
You and Your Child

Avocational and Recreational
(Non-Eligible for State General Aid)

Bowling
Bridge
Ceramics
Dancing
Dog Obedience Training
Golf
Knitting
Painting
Powder Puff Mechanics
Slim and Trim
Swimming

The length of the courses is determined by the substance in the courses and the needs of the adults.

Finally there are a number of special interest group programs also administered under adult education. A program for migrant workers has been set up to help deal with problems encountered by this group of people. The skills taught by the Adult Basic Education program are utilized to a large extent in the adult migrant education programs. Courses have been offered and are available for American Indians. Initiation for additional programming in this area is already underway.

Other special interest programs include the Iowa Course for Drinking Drivers mandated by House File 1082. The purpose of the course is to provide information concerning the effects of alcohol on an individual's ability to drive. By emphasizing the percentage of accidents where alcohol was involved and by selecting alternatives to driving while under the influence, it is hoped that the rate of injury and death can be decreased. Each of the 15 Iowa area schools offer the course. Classes are three hours in length and held once each week for four consecutive weeks. Other persons may attend on a voluntary basis if the maximum enrollment has not been reached.

Another such course is the Veterans Farm Program (Agricultural Production). Section 303, of Public Law 92-540, effective October 26, 1973, provides for a minimum of 440 clock hours of instruction over 44 weeks per year. All classes must be prescheduled as to provide not less than 80 clock hours in any three month period for full-time benefits. The 440 hour requirement does not preclude utilizing 8 weeks for work breaks.

The principle objective of the Veterans Farm Program is to provide meaningful instruction for the veteran farmer who is concurrently engaged in active agricultural employment. Specifically, the objective is to reinforce or supplement those skills that are needed by the farm veteran to improve and update his managerial ability of his agricultural operations.

The Veterans Farm Program is open to both veterans and non-veterans. To be eligible to receive benefits under the GI Bill, a veteran must have had at least 181 days of continuous active duty, any part of which occurred after January 31, 1955, or have been released from active duty after January 31, 1955 for a service-connected disability. The veteran must have been discharged under conditions other than dishonorable.

Specialized Programs

Apprenticeship programs are also conducted through adult education in the area schools. Apprenticeship training is an approach to providing young people with the manipulative skills and technical or theoretical knowledge needed for competent performance in skilled occupations. The offering usually involves cooperation among school, labor, and management, since apprentices learn the skills of the craftsman through on-the-job work experiences and the related information in the classroom. The Joint Apprenticeship Committee determines local requirements and instructional needs for apprenticeship offerings.

The apprentice attends classes a minimum of 144 hours each year to receive technical instruction related to his job. His instructor is selected by the Joint Apprenticeship and Training Committee. His work experience reports, school grades and attendance are reviewed regularly by the Joint Apprenticeship and Training Committee.

The adult education divisions of the area schools also conduct course offerings in correctional institutions in association with other rehabilitation techniques.

Some of the area schools have developed learning centers where students can study a wide variety of subjects. The advantage of these centers is that their location and time schedules provide an easy access for adult students from all walks of life.

The 1/3 Part F consumer and homemaking education program is designated for use in economically depressed areas or areas with high rates of unemployment. Consumer and homemaking career education offerings are designed to meet the following needs:

1. To meet needs arising from social and cultural conditions;
2. To prepare adults for the role of homemaker, or contribute to the employability of such adults in the dual role of homemaker and wage earner;
3. To emphasize consumer education as an integral part of the program, including promotion of nutritional knowledge and food use and the understanding of the economic aspects of food use and purchase; and
4. For persons who have entered, or are preparing to enter, the work of the home.

The aforementioned specialized programs were offered by the following area schools in fiscal year 1973.

Programs	Merged Area Schools
1/3 Part F Consumer Education Programs	I, VII, XII, XIII, XV
Apprenticeship Programs	I, II, V, VII, X, XI, XII, XV, XVI
Programs in Correctional Institutions	V, VI, X, XVI
Learning Centers	I, II, III, IV, VI, VII, IX, X, XI XII, XIII, XVI

The delivery system for adult education within the State of Iowa is unique with each merged area school having an adult education director and staff whose principal responsibilities are for the dissemination of the program. Consequently the director of adult education, dependent upon the size of the program, might have on his staff an adult basic education-high school completion coordinator, home economics coordinator, health occupations coordinator as well as other school personnel designated to deal with these and other supportive programs.

STUDENTS

Tables 8 through 11 present a composite picture of total enrollments in area schools during the 1973 fiscal year.

Table 8 provides a total headcount of all students enrolled in area schools. This headcount includes students eligible to receive state general aid as well as those students not eligible for this aid such as non-resident students, students enrolled in programs entirely funded by outside agencies and adult education students enrolled in continuing education of an avocational and recreational purpose. This headcount represents an increase of 55,870 over the headcount reported by public post-secondary two-year institutions for the 1972 fiscal year.

The total headcount is divided among the three major divisions of the institutions: adult education; career education; college parallel education, and the headcounts reported in the function, Activities Related to Instruction. Figure 1 indicates the distribution of headcount.

* *

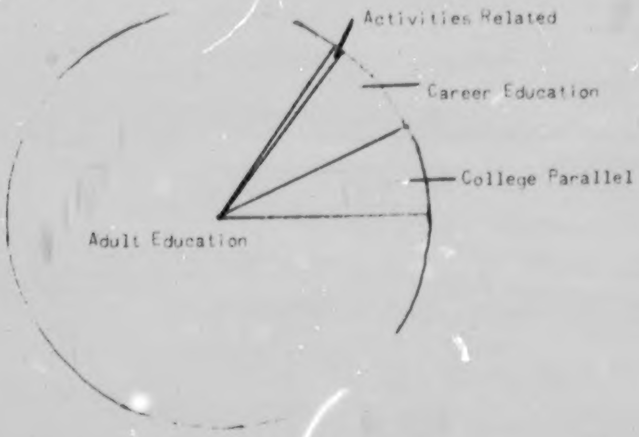

FIGURE 1

HEADCOUNT BY MAJOR DIVISIONS INCLUDING
STUDENTS NOT ELIGIBLE FOR STATE GENERAL AID

* *

The figures presented as headcounts for adult education do not represent an actual unduplicated headcount, but instead represent actual registrations in the adult education divisions. This figure is used since there are many thousands of adult education registrations and it is currently not feasible to attempt to trace all registrations to arrive at an accurate, unduplicated headcount. As a result, the figures for adult education include some duplication, since an individual student may have enrolled for more than one course during the school year.

Table 9 provides a headcount of all students enrolled in area schools similar to the headcount in Table 8, except only students eligible for state general aid are included in this headcount. This headcount represents an increase of 39,680 over the headcount reported by public post-secondary two-year institutions for the 1972 fiscal year.

Excluded from Table 9 are all students the area schools may not claim for state general aid. The majority of students excluded are non-resident students enrolled in full-time programs and part-time students enrolled in continuing education of an avocational and recreational purpose in adult education divisions.

Figure 2 indicates the distribution of headcount of students eligible for state general aid.

* *

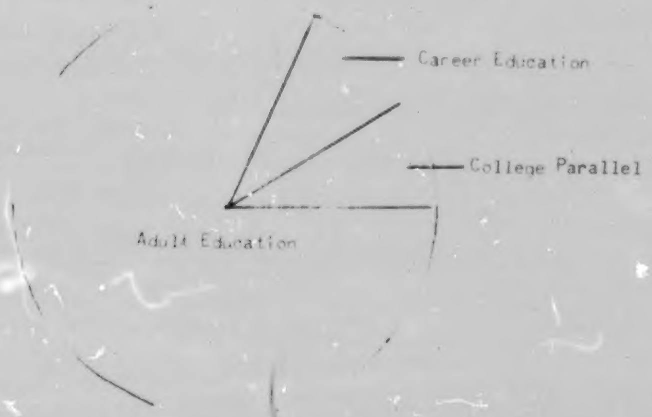

FIGURE 2

HEADCOUNT BY MAJOR DIVISIONS
STUDENTS ELIGIBLE FOR STATE GENERAL AID

* *

The great majority of students the area schools may not claim for state general aid are students enrolled in adult education divisions. Some 49,559 or over eighty-four percent of the 59,104 students not eligible to receive state general aid were enrolled in general adult programs in adult education divisions.

Table 10 indicates the full-time equivalent enrollment of all students enrolled in area schools during the 1973 fiscal year. The full-time equivalent enrollment is equal to the total number of reimbursable hours of all students divided by 540.

The full-time equivalent of all students is determined by first converting all contact hours to reimbursable hours. A reimbursable hour means:

(1) One contact hour of lecture in an approved course in career education or college parallel;
(2) Two contact hours of laboratory in an approved course in career education or college parallel; and
(3) Two contact hours in an approved course in adult education that is eligible for state general aid, except that adult basic education and high school completion courses will be reimbursed on a one contact hour basis.

The divisor 540 represents fifteen reimbursable hours per week for a period of thirty-six weeks.

The full-time equivalent enrollment reported for the 1973 fiscal year represents an increase of 1691.71 over the full-time equivalent enrollment reported by public post-secondary two-year institutions for the 1972 fiscal year.

Figure 3 indicates the distribution of full-time equivalent enrollment of all students.

* *

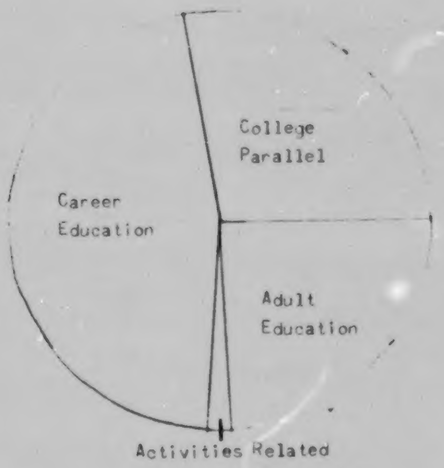

FIGURE 3

FULL-TIME EQUIVALENT ENROLLMENT BY MAJOR DIVISIONS INCLUDING STUDENTS NOT ELIGIBLE FOR STATE GENERAL AID

* *

Table 11 indicates the full-time equivalent enrollment of only those students eligible to receive state general aid during the 1973 fiscal year. This table excludes students the area schools may not claim for state general aid such as non-resident students and students enrolled in continuing education of an avocational and recreational purpose in adult education divisions. This full-time equivalent enrollment represents an increase of 1134.23 over the full-time equivalent enrollment eligible to receive state general aid reported by public post-secondary two-year institutions for the 1972 fiscal year.

Figure 4 indicates the distribution of full-time equivalent enrollment eligible to receive state general aid.

* *

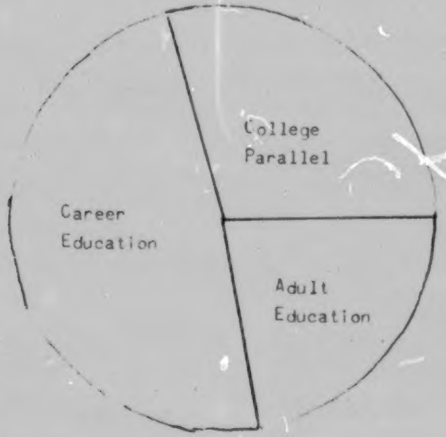

FIGURE 4

FULL-TIME EQUIVALENT ENROLLMENT BY MAJOR DIVISIONS
STUDENTS ELIGIBLE FOR STATE GENERAL AID

* *

Much of the full-time equivalent enrollment not eligible to receive state general aid represents students enrolled in avocational and recreational programs in adult education divisions and students in fully funded programs in function four, Activities Related to Instruction. Twenty-seven percent or 865.27 full-time equivalent enrollment of the 3215.27 full-time equivalent enrollment not eligible to receive state general aid was in general adult programs in adult education divisions and 677.92 or twenty-one percent in function four. Most of the remaining full-time equivalent enrollment not eligible for state general aid consisted of non-resident students in the college parallel and career education divisions.

Table 12 indicates the distribution by major categories of the full-time equivalent enrollment reported for General Adult on Tables 10 and 11 The three major categories are high school completion-federally funded, high school completion-non federally funded and general and continuing adult education. The columns on the left side of Table 12 indicate the distribution of General Adult from Table 10 which includes the full-time equivalent enrollment which is not eligible for state general aid and the columns on the right side of Table 12 indicate the distribution of General Adult from Table 11 which includes only the full-time equivalent enrollment which is eligible for state general aid.

Figure 5 indicates the distribution of General Adult education eligible for state general aid by the three major categories included in General Adult.

As reported by area schools on Form AS-10. This FTEE differs slightly from tables 7 and 8 because of variations in placement of figures on the audited reports.

Table 13 presents a composite picture of the total enrollment in area schools for the career education and college parallel divisions during the fall term of 1972. These enrollments include both fall quarters and fall semesters and identifies separately the enrollment in the Agricultural Production Program for Veterans (a special program for veterans employed full-time in agriculture).

This enrollment is the headcount of all students who registered through the end of the second week of the fall term and includes virtually all of the fall term full-time students as well as a number of part-time students enrolled in full-time programs offered in the career education and college parallel divisions. Excluded from this enrollment are the many thousands of part-time students enrolled in the adult education divisions of area schools and some students in full-time programs who registered after the end of the second week of the fall term.

The fall term enrollment reported in Table 13 is similar to the day division enrollments reported by many other two and four year institutions of higher education in their fall enrollment reports.

Figure 6 presents the fall term enrollment of area schools for career education and college parallel divisions.

* * *

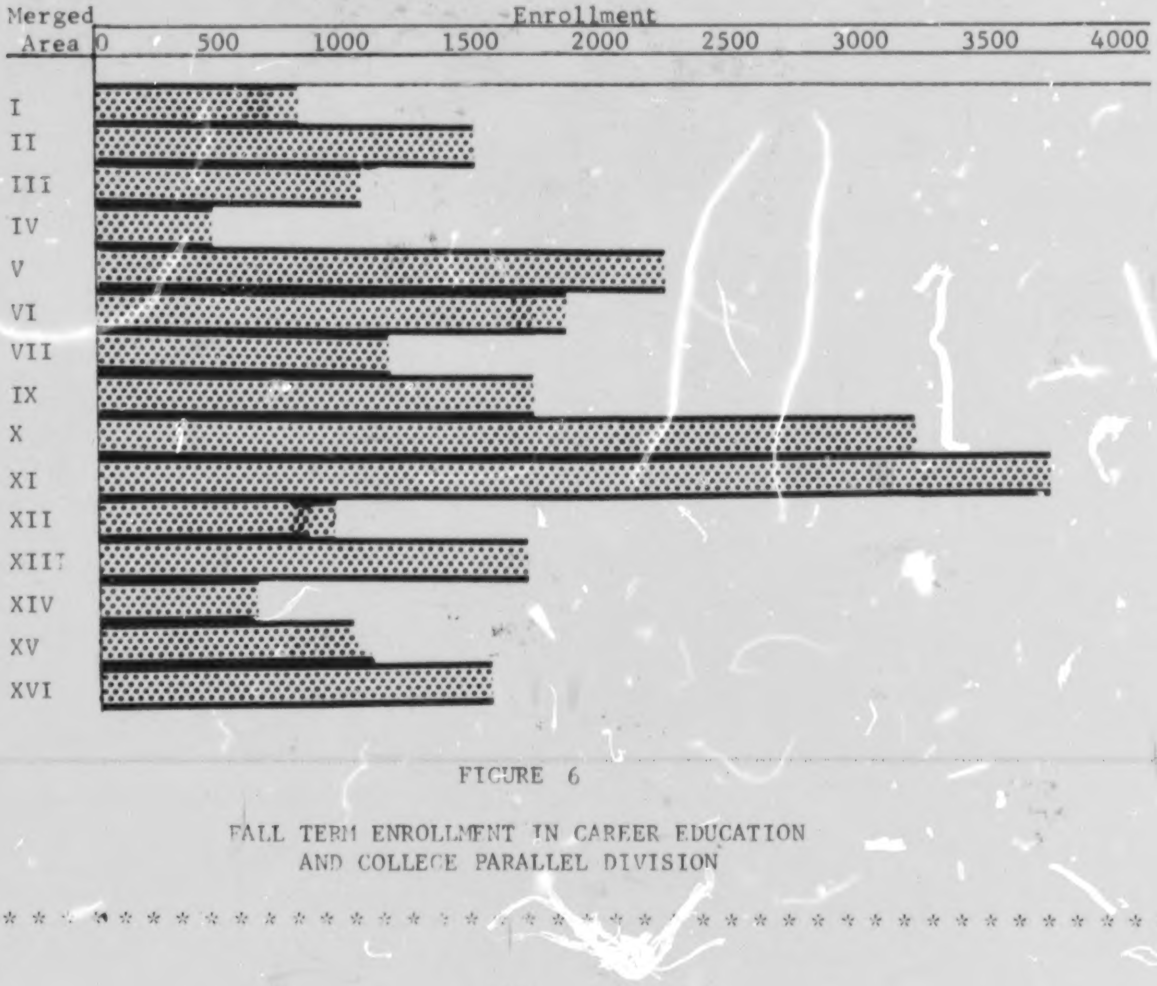

FIGURE 6

FALL TERM ENROLLMENT IN CAREER EDUCATION AND COLLEGE PARALLEL DIVISION

* * *

Table 14 presents the fall term enrollment by resident classification. Non-residents of Iowa are required to pay a higher tuition than residents of Iowa.

Table 15 presents the total fall term enrollment for each area school.

Table 16 presents the fall term enrollment of individual career education and college parallel programs in area schools. This enrollment includes the students in career education divisions identified by the major program in which they are enrolled and also identifies the taxonomy number of the programs. Similar information is included for programs in the college parallel division.

A distinct code has also been included to identify each program by its major functions.

This code includes instructional level, type, special emphasis and object and purpose. Further information on the coding of individual programs is available upon request from the Area Schools Division.

Table 17 presents the fall term enrollment of programs for area schools by state totals. Similar programs operated by more than one area school have been combined to provide a composite picture of programs enrollments for all area schools.

NOTE

Some individual programs with very small enrollments are operated as either options within other programs or operated in conjunction with another program.

Table 18 presents information on term enrollment for each term operated by an area school during fiscal year 1973. These term enrollments include only students enrolled in the career education and college parallel divisions and do not include adult education division registrations.

Table 19 presents information on a profile of students attending area schools during the fall term of 1972. This information on student characteristics was collected through a cooperative effort of the State Department of Public Instruction and the area schools as an effort to provide information on the type of students who attend area schools. An effort was made to collect information on student characteristics on all students who were reported during the fall term of the 1972 school year. Unfortunately, information was not collected on all students, but there were over 21,000 students responding to this student characteristic questionnaire. This represents the great majority of students enrolled during the fall term of the 1972 school year and also most of the full-time students enrolled in the career education and college parallel divisions.

Tables 20 and 21 present the number of new students attending area schools who came to the area school without previous college attendance. This information was obtained from area schools in the preliminary fall term enrollment report. Table 20 includes only part-time students and Table 21 only full-time students.

Table 22 presents the permanent residence by Iowa county of students enrolled during the fall term. This information includes only students included in the fall term enrollment as reported by the student characteristic questionnaire. Therefore, these figures include only students responding to this item on the questionnaire.

GRADUATES

Table 23 presents information on the number of students graduating from career education and college parallel programs in each area school during the 1973 fiscal year. This table includes information on students completing preparatory career education programs that are intended to prepare students for immediate entry into employment as well as college parallel programs (including each college parallel-career option program approved by the Department of Public Instruction). The great majority of programs reporting graduates are full-time programs of at least one quarter (12 weeks) in length. The students completing programs are identified according to the type of award presented to them upon completion of the program.

Table 24 presents a composite picture of all area school graduates of career education and college parallel programs during fiscal year 1973. This table identifies the total number of students in all area schools completing preparatory career education and college parallel programs.

* *

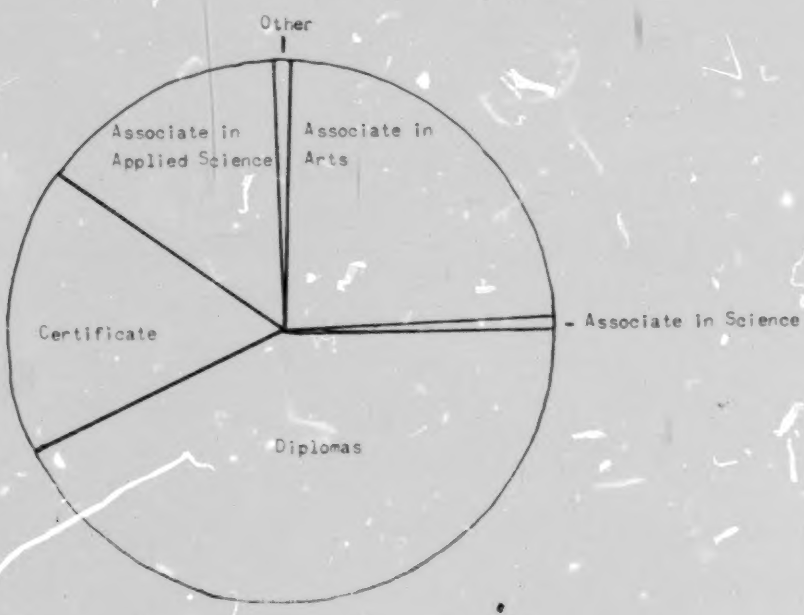

FIGURE 8
DISTRIBUTION OF AWARDS TO GRADUATES OF FULL-TIME CAREER EDUCATION PROGRAMS

* *

Figure 8 presents the distribution of awards presented to graduates of preparatory career education and college parallel programs. The most common award presented to graduates of these programs was a diploma.

TABLE 23

AWARDS GRANTED TO STUDENTS COMPLETING AREA SCHOOL PROGRAMS
(College Parallel and Preparatory Career Education Programs)
FISCAL YEAR 1973

This report does not include students completing the many short courses and supplementary career education programs offered by area schools.

Table 25 presents the number of students completing Adult Basic Education and High School Completion programs during the 1973 fiscal year. The Adult Basic Education program provides adults with an education equivalent to that of an eighth grade education. The High School Completion program includes work toward either a high school diploma or preparation for the high school equivalency certificate. The figures shown in Table 25 for High School Completion reflect the number of diplomas and high school equivalency certificates issued.

Table 26 presents information on the number of students who successfully completed selected supplementary career education programs through the adult education divisions of area schools during the 1973 fiscal year. The programs identified in Table 26 represent in some instances programs that area schools offered cooperatively with universities, associations, etc. These programs vary in length from one course to a series of short courses that lead to a certificate. The certificates, in many instances, were issued cooperatively by the area school and the cooperating agencies.

The programs in Table 26 are only a sampling of the many supplementary career education courses offered by area schools. More than 70,992 registrations were recorded by area schools in supplementary career education programs during the 1973 fiscal year.

PROFESSIONAL STAFF

The area schools employ a wide variety of professional employees to staff the diversity of programs offered by these institutions. The formal preparation level and prior experience of professional staff also varies greatly according to professional staffing needs of the curriculum.

Each staff member is selected on the basis of his individual competencies for a particular assignment and, as a consequence, the formal preparational background of a staff member may vary from less than a college degree in the case of some instructors in career education programs to a doctorate degree in the case of some instructors in college parallel programs.

Professional staff in area schools are required to meet state certification requirements. These requirements vary considerably depending on the type of program. Ordinarily, college parallel instructors are required to possess a master's degree with a major in the subject area that the instructor teaches and career education instructors are required to meet the requirements of the Iowa State Plan for the Administration of Career Education that ordinarily also includes at least two to three years of successful work experience in the occupational program in which the instructor teaches.

Instructors in adult divisions of area schools are required to meet the same requirements as instructors in the college parallel and career education divisions in comparable teaching assignments. However, in some assignments in the adult divisions such as adult basic education and adult continuing and general education, the instructor is assigned on the basis of experiencial background that must be satisfactorily demonstrated to the local institution.

Tables 27 through 41 present information on the professional staff of each area school. This information is obtained from the Iowa Professional School Employees Data Sheet (IPSEDS) that is completed by professional staff in the early fall of each school year.

This information includes virtually all administrative staff and instructional staff of the college parallel and career education divisions. However, very few instructors in adult education divisions are included in these tables since the majority of these instructors are part-time and many are not assigned teaching responsibilities until some time after the IPSEDS report is completed.

Table 42 presents a composite picture of all professional staff in area schools. This composite includes all 1858 professional staff completing IPSEDS reports for the fall term of 1972.

Table 43 presents a comparison of area school professional employees for the 1970-71 through 1972-73 school years. The total number of professional employees increased from 1,661 in the 1970-71 school year to 1,859 in the 1972-73 school year. It is interesting to note that the number of professional employees classifying their primary assignment as administrators decreased from 218 in the 1970-71 school year to 196 in the 1972-73 school year.

Table 44 presents information on area school professional employees for the 1972-73 school year who classified their assignments as administrative.

Table 45 presents information on area school professional employees for for the 1972-73 school year who classified their assignments in the area of career education.

Table 46 presents information on area school professional employees for the 1972-73 school year who classified their assignments in the area of college parallel education.

Table 47 presents information on area school professional employees for the 1972-73 school year who classified their assignments in the area of student services.

Tables 45 and 46 do not identify professional staff in adult education and therefore it is expected that a small number of staff employed primarily in adult education may be included in either tables 45 or46 .

Table 48 presents information on the racial background of area school professional employees for the 1972-73 school year. Over ninety-eight percent of all professional employees classified themselves as caucasian.

Figure 9 presents an illustration of the highest formal educational preparation attained by professional staff in area schools. The highest formal preparation obtained by the greatest number of professional staff was the master's degree.

TABLE 43

HIGHEST FORMAL EDUCATIONAL ATTAINMENT OF AREA SCHOOL PROFESSIONAL EMPLOYEES

LIBRARY

There is no better example of the unique design of the concept of Iowa's area schools than the library or instructional resource center in the fifteen merged area schools.

The library in each merged area has developed as a result of local philosophy, needs and resources. The libraries of the merged area schools have survived the external-internal demands to centralize, decentralize, add diverse types of media, concentrate on books and periodicals, use one system of card reference or another, add various recommended numbers of volumes, spend various percentages of total operating expenditures, and many other recommendations.

The libraries in the merged area schools have developed with the concept of an instructional resource center. These instructional resource centers serve the diversity of programs offered by area schools and frequently provide extensions of their services within specialized curriculums as well as accommodating branch campus requirements and other satellite attendance centers throughout the merged areas. In several area schools, major instructional resource centers are available on each of the major campuses.

The number of materials available in instructional resource centers vary considerably from one area school to another. Several of the area schools have well organized instructional resource centers with extensive materials; many of these institutions acquired a considerable portion of these materials from the former public community and junior colleges which merged with them. Other area schools have less extensive resources but are currently developing adequate instructional resource centers to meet the needs of the programs they offer.

The procedure for housing instructional resource materials also varies considerably. In some area schools the materials are housed in a single center. In other area schools the materials are dispersed to a much greater extent and are frequently housed in sites convenient to specialized programs.

Table 49, 50, and 51 present the resources and staff of instruccional resource centers in area schools. This information was obtained from an annual library report submitted to the Area Schools Division. The multi-campus area schools have combined their individual campus reports in some cases when compiling this report.

Table 49 presents information on the library staff available in instructional resource centers. This table includes all staff identified as holding positions in instructional resource centers. This table also indicates the presently vacant positions that will be filled. Table 50 presents information on resources available in instructional resource centers in area schools. This table provides information on the number of materials available as well as the materials added during the 1972-73 school year.

Table 51 presents information on library operating expenditures and library services during the 1972-73 school year. This table includes expenditures for library materials as well as library salaries.

Figure 10 presents a picture of the distribution of volumes by area schools. Area schools that merged with existing community and junior colleges generally have relatively larger holdings in proportion to student enrollments than those institutions that did not merge with any existing two-year institution.

*Includes work study assistance.

PHYSICAL FACILITIES

The area schools are currently in the midst of an extensive building program to complete the physical plant required for operating programs. Although some area schools were able to acquire facilities operated by former public community and junior colleges with which they merged, a number have had to begin operation in rented physical facilities while development was initiated on permanent facilities.

Funds for the development of physical facilities are obtained from three major sources: the local 3/4 mill levy for the Plant Fund; state grants for the construction of vocational facilities; and funds from federal sources such as the Higher Education Facilities Act of 1963.

The 3/4 mill local levy is a voted levy for a period not to exceed five years that must be approved by a majority of those voting in the merged area. The vocational grants are obtained as a result of appropriations by the General Assembly of Iowa and to date total $15,500,000 for all area schools. The federal grants are obtained through an application procedure that is available only to institutions that meet certain federal requirements. To date, some area schools, particularly area vocational schools, have not had an opportunity to meet these federal requirements.

An amendment to Section 280A.22 approved by the Second Regular Session of the Sixty-fourth General Assembly in 1972 permits merged areas to borrow funds in anticipation of the collection of the tax voted for school facilities.

Table 52 presents the status of the state grants for the construction of vocational facilities, as of June 30, 1973. All of the funds appropriated by the General Assembly have been allocated to area schools in accord with recommendations of the Iowa State Board of Public Instruction and the State Advisory Committee for Area Schools and all of the funds appropriated by the General Assembly have been released to area schools.

Table 53 presents the status of the construction of buildings for vocational education programs as of June 30, 1973. This table includes only those buildings constructed with funds available from the state grants for vocational facilities.

Table 54 presents information on the sites acquired by area schools and the amounts expended to acquire these sites. The area school site at the Scott Campus was obtained as a gift.

Figure 11 is a graph showing in summary the amount of funds appropriated ($15,500,000) for the construction of career education physical facilities allocated to each of the area schools.

Tables 55 and 56 present information on the number of square feet in buildings owned or rented by area schools at the end of fiscal year 1973.

Table 55 presents information on the individual buildings owned by area schools including location, date of original construction, building function, building condition and cost of building.

Table 56 presents information on the individual buildings rented by area schools including location, building function, building condition and rental payments.

*Four (4) buildings under one (1) lease-purchase agreement. Payments include interest. Total cost of buildings including interest 626,746.29. Total cost of excluding interest 574,818.18.

**Interest from investments in plant fund.

BUILDING CONDITION

1. Satisfactory - Suitable for continued use with normal maintenance.
2. Remodeling A - Requires restoration to present acceptable standards without major room use changes, alterations, or modernizations. The approximate cost of "Remodeling A" is not greater than 25% of the estimated replacement cost of the building.
3. Remodeling B - Requires major updating and/or modernization of the building. The approximate cost of "Remodeling B" is greater than 25%, but not greater than 50% of the estimated replacement cost of the building.
4. Remodeling C - Requires major remodeling of the building. The approximate cost of "Remodeling C" is greater than 50% of the replacement cost of the building.
5. Demolition - Should be demolished or abandoned because the building is unsafe or structurally unsound, irrespective of the need for the space or the availability of funds for a replacement. This category takes precedence over categories 1, 2, 3, and 4. If a building is scheduled for demolition, its condition is recorded as "demolition," regardless of its condition.
6. Termination - Planned termination or relinquishment of occupancy of the building for reasons other than unsafeness or structural unsoundness, such as abandonment of temporary units or vacation of leased space. This category takes precedence over categories 1, 2, 3, and 4. If a building is scheduled for termination, its condition is recorded as "termination," regardless of its condition.

BUILDING CONDITION

1. Satisfactory - Suitable for continued use with normal maintenance.
2. Remodeling A - Requires restoration to present acceptable standards without major room use changes, alterations, or modernizations. The approximate cost of "Remodeling A" is not greater than 25% of the estimated replacement cost of the building.
3. Remodeling B - Requires major updating and/or modernization of the building. The approximate cost of "Remodeling B" is greater than 25%, but not greater than 50% of the estimated replacement cost of the building.
4. Remodeling C - Requires major remodeling of the building. The approximate cost of "Remodeling C" is greater than 50% of the replacement cost of the building.
5. Demolition - Should be demolished or abandoned because the building is unsafe or structurally unsound, irrespective of the need for the space or the availability of funds for a replacement. This category takes precedence over categories 1, 2, 3, and 4. If a building is scheduled for demolition, its condition is recorded as "demolition," regardless of its condition.
6. Termination - Planned termination or relinquishment of occupancy of the building for reasons other than unsafeness or structural unsoundness, such as abandonment of temporary units or vacation of leased space. This category takes precedence over categories 1, 2, 3, and 4. If a building is scheduled for termination, its condition is recorded as "termination," regardless of its condition.

FINANCIAL

Tables 57 through 70 present information on financial resources and expenditures of area schools. This information is collected in accord with the uniform financial accounting system for area schools adopted by all area schools during the 1969-70 school year.

The information presented on financial resources and expenditures was taken from records submitted by area schools. The figures from fiscal year 1973 have not been compared with audited figures from the State Auditor's office since audited figures on all area schools were not available at the time this publication was prepared.

Income to the General Fund in fiscal year 1973 for each of the area schools was derived from four major sources. These sources were state general aid, tuition, vocational aid (state and federal) and the local support derived from the 3/4 mill levy for operational purposes.

Table 57 presents a comparison of the total revenue and expenditure of the General Fund for fiscal year 1972 and 1973. Expenditures in the General Fund are grouped in nine functions. The first four functions ((vocational technical (career education), liberal arts and science (college parallel), adult education and activities related to instruction)) are for direct program expenditures and the last five (administration, student services, learning resources, physical plant and organized research) for recording expenditures in the support functions.

Figure 12 presents the revenue and expenditures of the General Fund of all area schools for fiscal year 1973.

Table 58 presents information on actual revenue and expenditures for fiscal years 1972 and 1973 and the projected revenue and expenditures for fiscal year 1974.

Table 59 presents a summary of actual revenue and expenditures in the General Fund for fiscal year 1973 by area school that indicates the percent of each amount.

Table 60 presents a summary of actual revenue and expenditures in the General Fund for fiscal year 1973 that indicates the specific components for each of the major classifications. A percent is also included for each figure.

Table 61 presents a comparison of actual revenue as opposed to the projection of revenue prepared by each area school prior to fiscal year 1973. Area schools projected $2,274,141 more revenue than they actually received and the single greatest source of revenue that was overestimated was federal support.

Table 62 presents a comparison of actual expenditures as opposed to the projection of expenditures prepared by each area school prior to fiscal year 1973. Actual expenditures for all area schools were $2,898,229 less than projected expenditures. The function that was overestimated the most was function four, Activities Related to Instruction. This function includes fully funded programs from outside sources and usually includes a significant number of anticipated federal programs.

Figure 13 indicates the revenue and expenditures for fiscal year 1973 assigned to the four educational functions in the General Fund as required by Section 286A.12, Code of Iowa. This assignment of funds requires a proration of the five indirect functions that is primarily based on contact hours. The undistributed revenue consists for the most part of the income obtained from the local 3/4 mill levy for operational purposes.

Table 63 presents information on the assignment of state general and vocational aid to the three major educational divisions of area schools for fiscal year 1973.

Table 64 presents information on the assignment of state general aid only to the three major educational divisions of area schools for fiscal year 1973.

Table 65 presents information on the assignment of state vocational aid only to the vocational-technical (career education) and adult education divisions of area schools for fiscal year 1973.

Table 66 presents information on the revenue received by area schools for the Plant Fund for fiscal year 1973. The greatest single source of revenue to the Plant Fund was the revenue obtained from the local 3/4 mill voted levy for the Plant Fund.

Table 67 presents information on the expenditures made by area schools from the Plant Fund for fiscal year 1973. Over ninety-six percent of the expenditures from the Plant Fund was made for capital outlay.

Table 68 presents information on the tuition charged by area schools during fiscal year 1973. Tuition charges for non-Iowa residents are required by statute to be not less than one hundred fifty percent and not more than two hundred percent of the tuition charged to Iowa residents.

Table 69 presents information on the fees charged by area schools during fiscal year 1973. Area schools are authorized to receive revenue from fees by Section 280A.18 (7), Code of Iowa. The expenditure of funds collected for activities is determined by the student government unit with administrative and board approval.

Table 70 presents summary information on the cost of programs in area schools for fiscal year 1973. This table includes the total program cost as well as the program cost per contact hour of instruction and per full-time equivalent enrollment (FTEE). These figures are subject to change when the state audit is completed.
